Instructions

Note: Since the D-type cable (XC-933) contains multiple plugs, the required cable varies depending on the factory radio. To avoid issues such as the radio not powering on due to incorrect cable connections, be sure to carefully follow the installation tutorial steps.

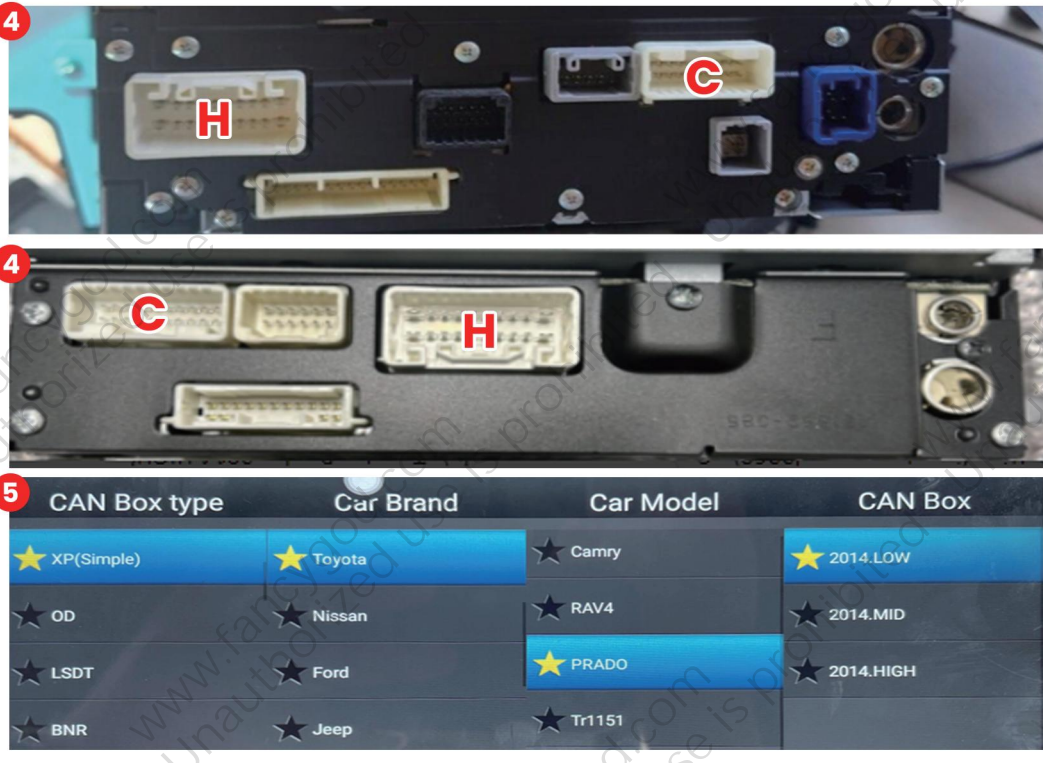

If the harness is not labeled, you can also identify connectors A, B, C, D, E, F, G, and H by their shape or pin configuration.

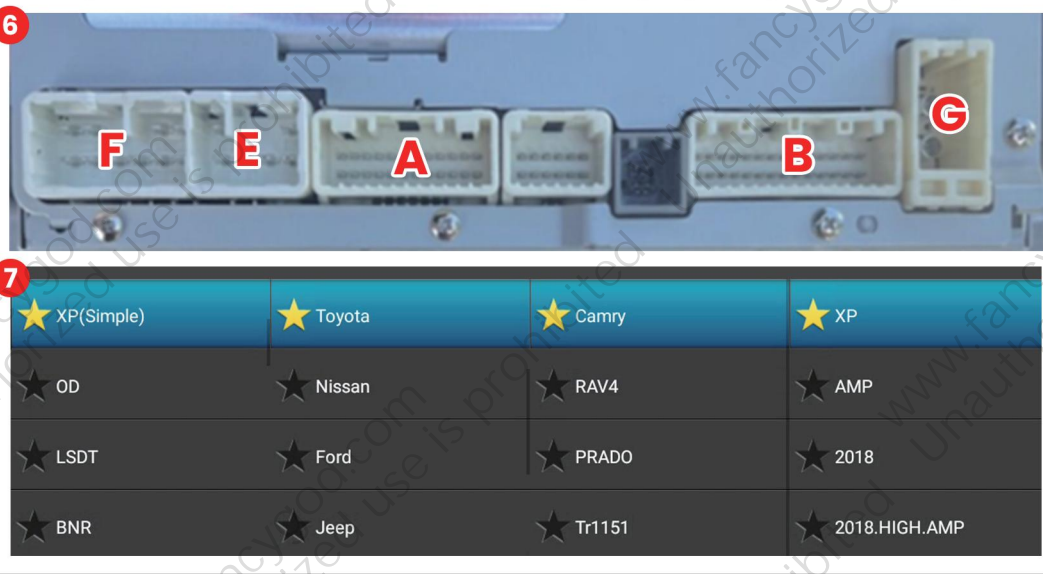

If your factory radio matches Image ①, please use C, F, and E harness from the **D-Cable (XC-933)** (The remaining harness do not need to be connected) to connect with the factory car radio plug, and follow the steps shown in Image ②:
Please press "Settings" → "Factory Settings" (enter the password 3368) → "Car Model," to choose "NULL—OTHER—No Protocol—Null."
If your car has steering wheel control buttons, please follow the instructions in Image ③, open the SWC app on the radio, and manually learn the steering wheel control keys according to the app's instructions.

If your factory radio matches Image ④, please use C and H harness from the **D-Cable (XC-933)** (The remaining harness do not need to be connected) to connect with the factory car radio plug, and follow the steps shown in Image ⑤:
Please press "Settings" → "Factory Settings" (enter the password 3368) → "Car Model," and choose "XP(Simple)—Toyota—PRA—DO—2014.LOW."

If your factory radio matches Image ⑥, please use the F, E, A, B, and G harness from the **D-Cable (XC-933)** (The remaining harness do not need to be connected) to connect with the factory car radio plug, and follow the steps shown in Image ⑦:
Please press "Settings" → "Factory Settings" (enter the password 3368) → "Car Model," and choose "XP(Simple)—Toyota—Camry—XP."

If your factory radio matches Image ⑧ (with JBL sound system), please connect H, A, B and G harness from the **D-cable(XC-933)** (The remaining harness do not need to be connected) to the plugs from factory radio , and follow the steps shown in Image⑨

Please press "Settings" → "Factory Settings" (input password 3368) → Car Model," and set it to "XP(simple) – Toyota – Camry – AMP."

If sound abnormalities persist after selecting AMP,switch the CAN Box option to "2018.HIGH.AMP."
